DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it is not in a single paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-6, 10, 12-20, 24, 26-30 and 32-36 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2006/0005310 A1 (hereinafter Nakamura)

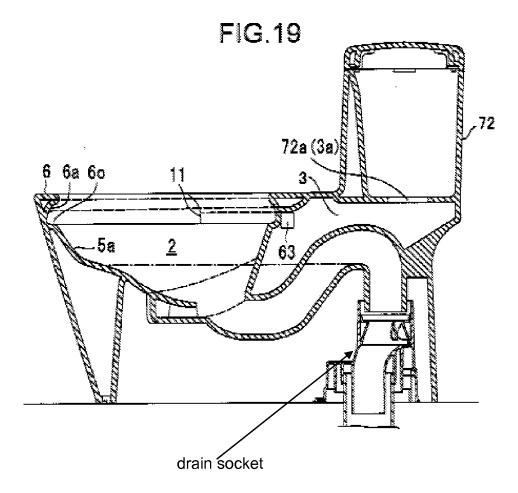

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Nakamura discloses a drain socket as claimed as shown below:

Application/Control Number: 10/535,689

Art Unit: 3751

4. Claims 1-6, 10, 12-19, 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2001220805 A (hereinafter Miyagami).

Miyagami discloses a drain socket as claimed comprising a drain socket (see Fig. 9) as claimed, a siphon inducing region as claimed (about 74), two straightening vanes (76a) as claimed in a channel expansion section and a groove therebetween. The introductory statement of intended use and all other functional phrases have been carefully considered but are deemed not to describe any structure patentably distinguishable over the drain socket that disclosed by Miyagami which is certainly capable of being used in the claim manner.

Application/Control Number: 10/535,689 Page 4

Art Unit: 3751

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 7-9, 11, 21-23, 25 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura.

Although the Nakamura reference is silent of the specific dimension and range as claimed, it would have been obvious to one of ordinary skill in the art at the time the invention was made to arrive at the specific dimension and range as claimed since it has been held that discovering an optimum value of a result effective variable or the optimum or workable ranges involves only routine skill in the art.

7. Claims 7-9, 11, 20-23, 25 and 27-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyagami in view of JP 08326136 A (hereinafter Yosuke).

Although the Miyagami reference is silent of the specific dimension and range as claimed, it would have been obvious to one of ordinary skill in the art at the time the invention was made to arrive at the specific dimension and range as claimed since it has been held that discovering an optimum value of a result effective variable or the optimum or workable ranges involves only routine skill in the art. Although the Miyagami drain socket does not appear to have a bent pipe, attention is directed to the Yosuke reference which discloses an analogous drain socket having a bent pipe (about 4) as claimed that can obvious be incorporated into the drain socket of Miyagami by one

Art Unit: 3751

skill in the art at the time the invention was made. The number of grooves as claimed would have been an obvious design choice by one skill in the art.

Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. JP 11-269951 discloses a vane in a toilet drain pipe to reduce swirling water flow.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan N. Nguyen whose telephone number is 571-272-4892. The examiner can normally be reached on Monday-Friday (10:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Huson can be reached on (571) 272-4887. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
